

Fulfilling Our Promise

Steere House

NURSING & REHABILITATION CENTER

October 21, 2020

Dear Family and Friends:

I am writing to notify you that Steere House is aware of staff positive test for COVID-19. The staff involved used appropriate PPE during their shift. As required, we have discussed the exposure with the Rhode Island Department of Health and will be taking the following steps:

1. All the residents of Steere House will be tested.
2. All the staff will be tested.
3. At this time, NO changes are required and visitation will continue as scheduled.

When we receive the test results and only if your loved one is positive, a nurse or doctor will call you.

I am sincerely grateful for all the patience and understanding at this time. It is very important to Steere House to be cautious and vigilant and these actions are taken with that philosophy and the protection of our community in mind.

Sincerely,

Julie H. Richard, NHA, MA, Executive Director
